

TRU GOLF

SIMULATORS

REAL NUMBERS. REAL GOLF.

"As a former PGA Tour player and now coach to PGA Tour players, I've been able to use most simulators on the market. Using my TruGolf Simulator, I not only love the accuracy of the ball flight, but the short game is night and day different from other companies. If I have a 4-foot putt, I hit a 4-foot putt. The accuracy is second to none."

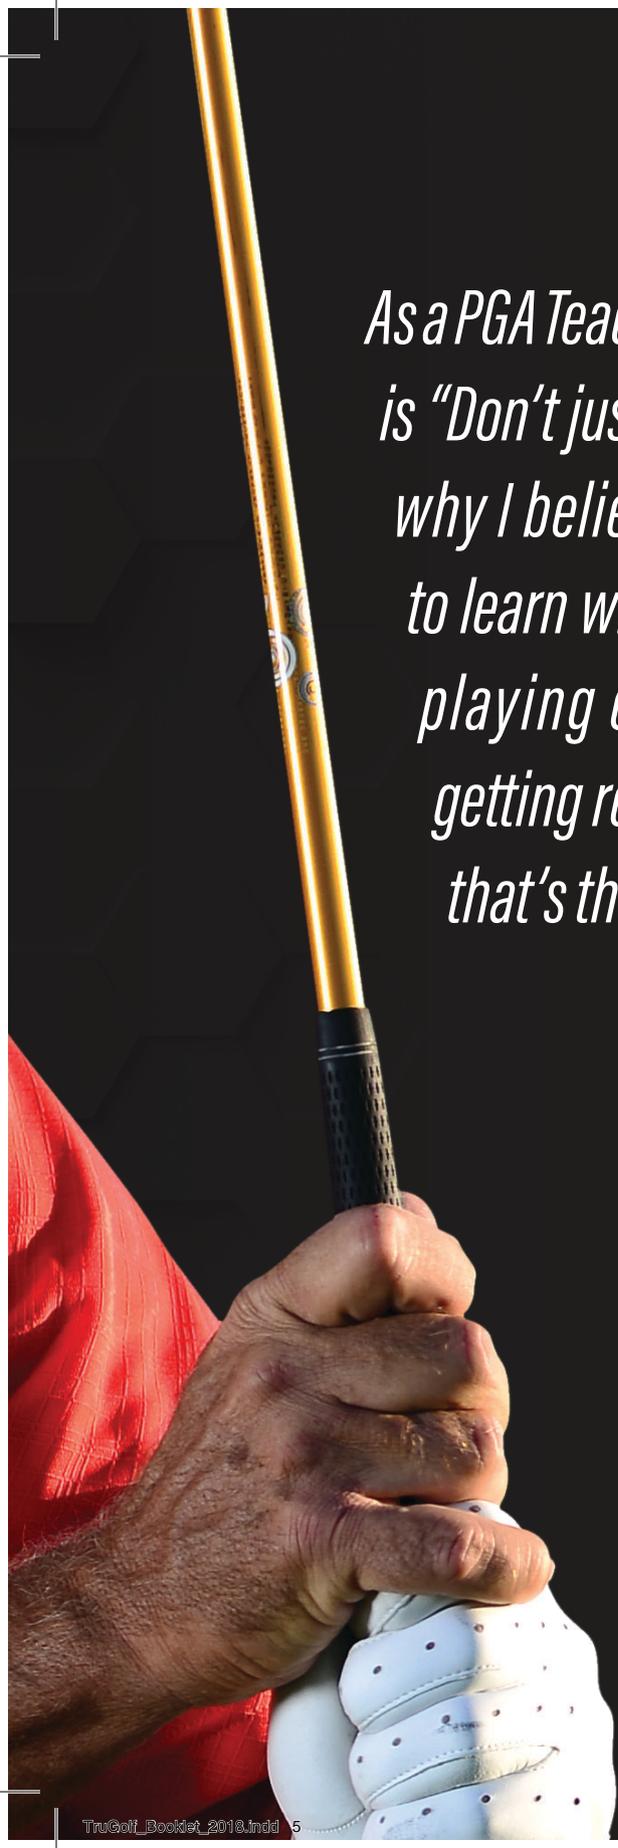

-Boyd Summerhays

As a PGA Teaching professional, my philosophy is “Don’t just play golf: understand it.” That’s why I believe a simulator is a better place to learn what’s going on in your game than playing on an outdoor course. You are getting real data from your equipment and that’s the most important part of learning.

Twenty years ago, this wasn't the case; the consistency and accuracy of simulators were marginal at best. But it's incredible the information you can get from this technology now. And, after trying all the major tracking systems, launch monitors and swing aids available, I can tell you the data that TruGolf's system captures is as accurate as anything on the market. It provides real numbers for real golf, maximizing your ability to perform and improve. TruGolf can tell you exactly what happened on your shots and the technology does not miss a thing.

The accuracy of TruGolf's software extends to its graphics as well. With E6 CONNECT, you will be amazed at how incredibly life-like the courses are. When you're in the booth, it feels like you are stepping onto the real courses. TruGolf maps its courses using LiDAR data, which means you are playing the actual course, not just something that looks like the course. Every tee box, tree, bunker and green is exactly where it would be if you played that same course tomorrow.

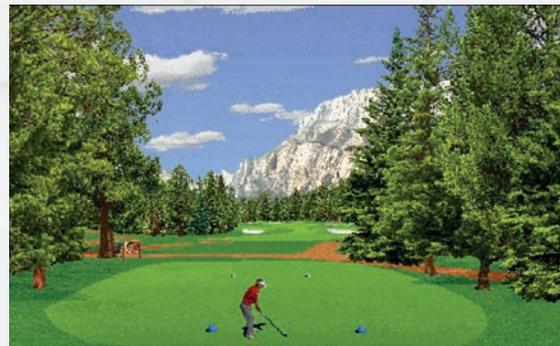

The TruGolf system is the very best. That's why I had one installed in my home teaching facility.

WHO WE ARE

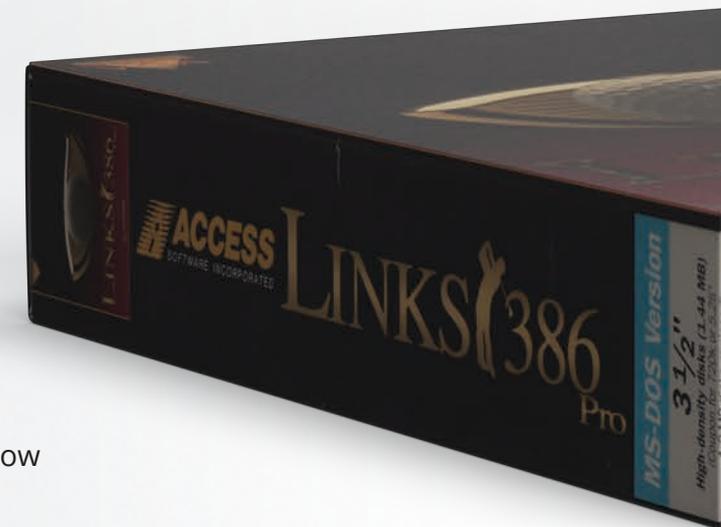

30 Years of Developing the Finest Golf Simulation Solutions

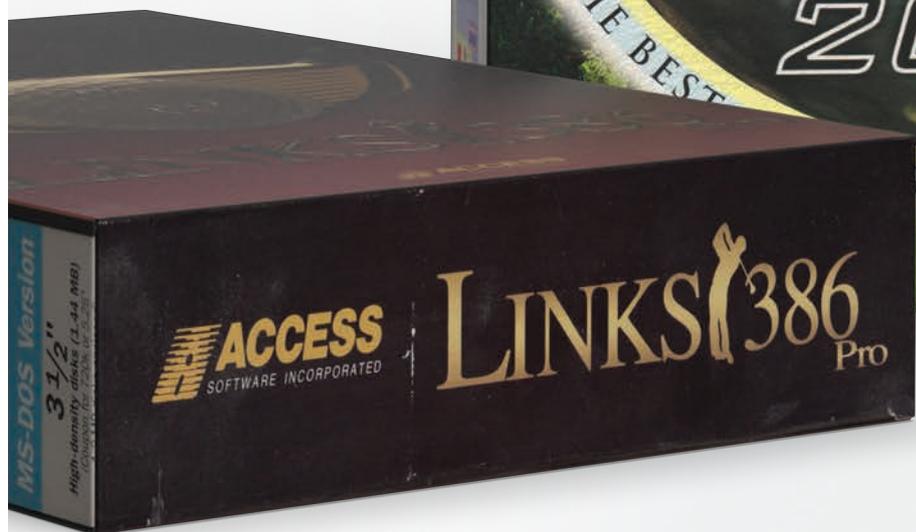

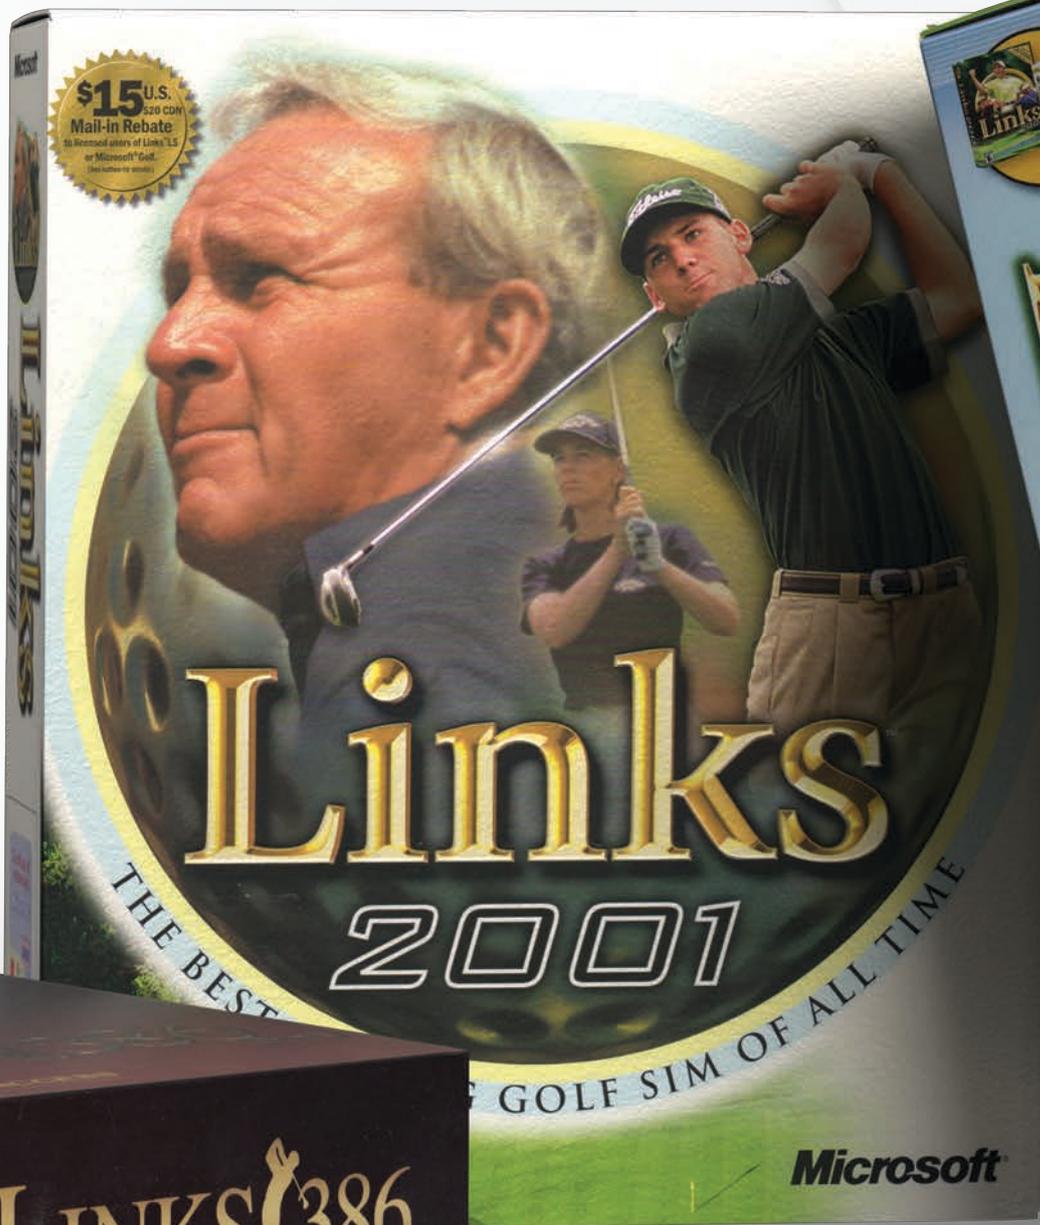

TruGolf offers innovative indoor golf solutions, including Simulation Software, Launch Monitors, and Enclosures. TruGolf began as a subsidiary of Access Software, the company that pioneered golf simulation on the PC with its hugely successful LINKS series. LINKS went on to become one of the biggest-selling PC Gaming sports titles of all time.

Access Software invented 3D golf simulation. TruGolf has perfected it.

With over 30 years of experience, we are a group of professionals who understand what it takes to build a successful business. When you choose a TruGolf System, you are choosing to work with one of the longest tenured and most respected golf companies in the industry. We look forward to sharing our knowledge to help you grow your business, or just improve your golf game.

TRUGOLF SIMULATORS

In 2005, TruGolf began developing Launch Monitor technology with a wide variety of features and price points. Our simulators are some of the most technically-advanced products on the market, with hardware designed to optimize our proprietary software, E6 CONNECT. TruGolf systems achieve the maximum performance both technically and aesthetically, giving players a deeply immersive experience.

BAY 2

Get ready to play

SHORT GAME SPECIALISTS

Don't accept a "gimmie" from your technology

"Short Game Specialists" is not simply a marketing slogan; it's a mission statement. With a TruGolf Simulator, you can play every shot—from the tee shot to a tap-in putt—just like you would out on the course.

Our proprietary tracking system was developed with a simple, but fundamental rule: every shot counts. That is why our engineers have designed, re-designed and refined our tracking system to capture data at the Point of Impact. This innovation makes it possible to read the most delicate chips, flops and shortest putts, giving our customers a holistic golf experience and, most importantly, helping them to lower their scores.

WHY TRUGOLF

At TruGolf, we design and manufacture our hardware and software in-house. The result is more responsive customer service, unmatched quality and superior value for our partners and their customers. When you choose our systems, we take that responsibility seriously. Our relationship does not end after installation; it will be a partnership for years to come.

"The TruGolf Simulator has been the best addition to the house so far. If I want to get in a late-night practice session I can do that or if I want to just go compete against my buddies for nine holes I can do that too. The versatility is what makes it so much fun!"

-George Bryan IV - Bryan Bros Golf

DESIGNED FOR INDOOR USE

Since 1999, we have been designing innovative hardware solutions exclusively for indoor golf. Our tracking system has been optimized for commercial durability. Our newest Launch Monitor, TruFlight 2, offers flexibility and has been specifically designed for indoor use. This full camera system captures a panorama of club and ball data for both left- and right-handed golfers.

OPTIMIZED FOR E6 CONNECT

Our software can only be as accurate as the data we collect, so our in-house team of engineers works closely with our software development team. The result is hardware solutions that maximize the realism of our software.

An example of this is our new authentic Stimp Meter. Because TruGolf hardware is one of the only options on the market to capture short chips and putts, we made sure to design our greens to be as realistic as possible. In order to fully experience E6 CONNECT, customers need technology that allows them to play every shot just like they would on the course.

INTUITIVE DESIGN

As an industry leader in golf performance technology, TruGolf has designed the most intuitive solutions for serious golfers and teaching professionals throughout the world. However you use our systems—whether it's teaching, club-fitting, league play or entertainment—you'll find them easy to use and constantly refined and updated so you can focus on running your business and making money.

LOW COST OF OWNERSHIP

TruGolf Simulators have the lowest cost of ownership of any manufacturer. We have no additional fees for hardware warranties or licensing, plus we offer our existing customers discounts on upgrades for both hardware and software.

FAMILY FRIENDLY

With E6 CONNECT, we have made the game of golf more fun and accessible for young and casual players. Our innovative technology solutions include: Power Boost, Slice and Hook Reduction, Junior Courses, Arcade Style Games and more.

INTRODUCING TRUFLIGHT 2

Superior Technology. Unmatched Value.

“Insight: the capacity to gain an accurate and deep intuitive understanding.”

If the key to improvement is understanding the game, then TruFlight 2 is the ultimate solution.

For the past two years, our engineers have worked with business owners, home users, and PGA Professionals to develop our newest camera tracking system. The TruFlight 2 has been designed to meet our customers unique needs, with an emphasis on multi-sport functionality.

This new Launch Monitor captures every shot with unmatched accuracy at an unbeatable price.

TruFlight 2 is a high-speed camera system that captures club head and ball data at 3200 Frames Per Second. Our proprietary image analysis system provides instantaneous results and unparalleled accuracy. This Launch Monitor attaches to the ceiling of your golf simulator—**removing all tracking hardware from the floor**—making TruFlight 2 ideal for commercial locations. This tracking system also works for both right- and left-handed golfers, allowing for seamless, uninterrupted play.

RETURN ON INVESTMENT

HELPING YOU SUCCEED

To have a successful indoor golf center, you need a strategic partner that's here to stay. With nearly 30 years of experience, TruGolf is owned and operated by the same core team that started the company. Because we own the technology and manufacture our hardware in-house, no competitor can beat our price. Additionally, TruGolf offers loyalty discounts and cost effective paths to upgrade for existing customers, ensuring you always have the latest technology at the best price.

TruGolf offers hardware solutions at every price point, with flexible financing options. Whether you are looking to own or lease the technology, we have a financial solution to match your need. The benefits of using TruGolf are unmatched. Our partners have seen increased revenue through: Lessons, Food & Beverage, and League Play, while keeping the cost of their initial investment low.

To put it simply, no company maximizes your ROI like TruGolf.

SUBSCRIBE & SAVE

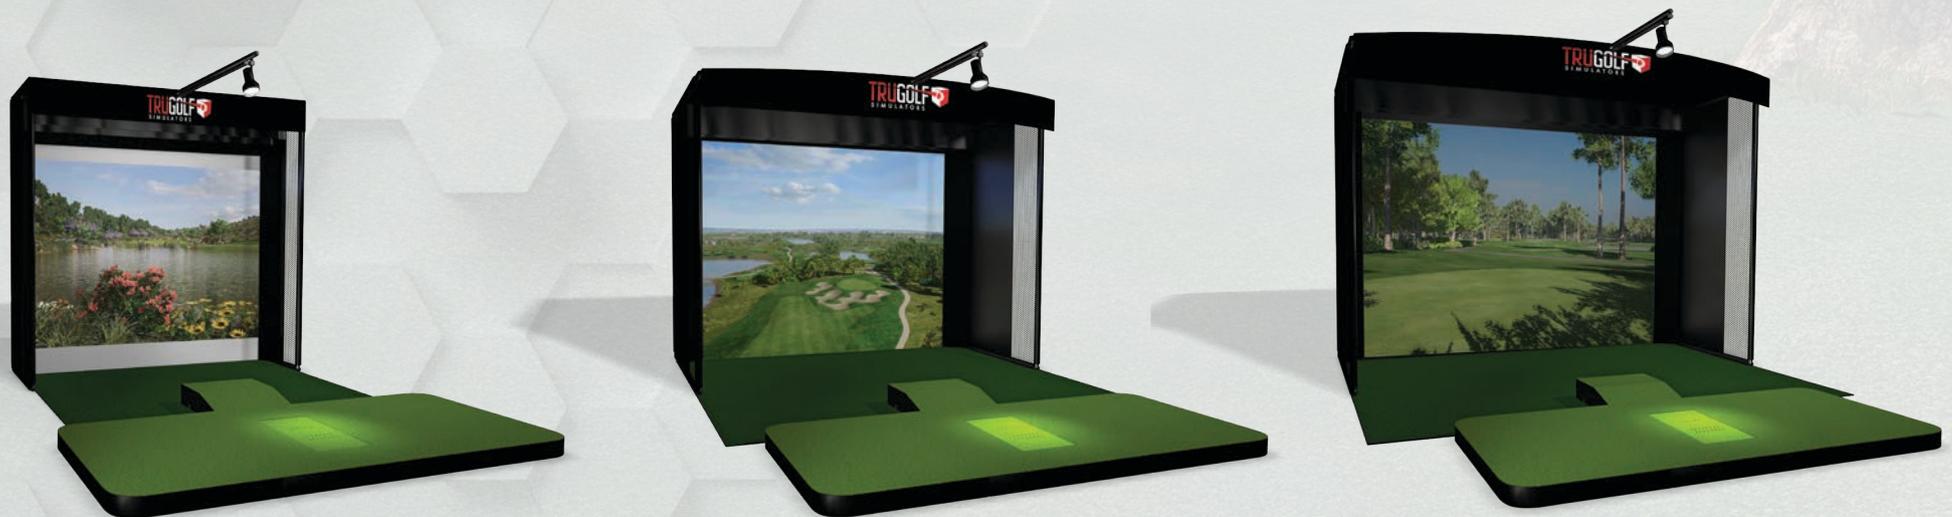

E6 CONNECT is an all new way to power your golf technology. Now, users will no longer have to pay individually for expensive software modules. E6 CONNECT subscribers will have access to new Courses, Games, Professional Tools, and more as they are made available. Beyond new content, users will always be entitled to the latest version of E6 CONNECT, including new features, Modes of Play, and content improvements made throughout the life of the product.

E6 CONNECT offers two levels of subscription: Basic, which unlocks all functionality and some additional content and Expanded, which unlocks all functionality and content. Courses, Games, and Tools are available for purchase, but the Subscription is priced to offer significant savings compared to purchasing.

VISTA

The Vista Series turns any space into a complete Swing Analysis Studio. These portable simulators are sold complete with Club Fitting, Course Play and Practice Range Software.

VISTA 8

With its compact size, the Vista 8 is the most affordable option from the Vista Series. These portable golf simulators are designed with a revolutionary tension system, resulting in an impact screen held firmly in place for a crisp, clear image. The light-weight aluminum frame is easily set up and taken down for unprecedented portability.

CUSTOM SIMULATORS & MODULES

For customers looking to build a simulator in their home, clubhouse, or commercial facility, TruGolf's team of Audio Visual Specialists are waiting to work with you and your contractor. These custom Built-In models are the convergence of cutting-edge technology and bespoke interior design. This indoor golf solution offers unmatched flexibility and can double as a multi-media entertainment center.

Are you looking for a completely custom solution? TruGolf offers Modules for customers interested in designing and assembling their own setup. TruFlight 2 is easily integrated into existing indoor golf spaces. Purchase our technology as a stand-alone package and configure your own setup for advanced technology at an unbeatable price point. Customer looking to upgrade their technology can purchase the stand-alone Launch Monitor to retrofit their current simulator hardware.

INSTALLATIONS

"As a PGA Professional I use the TruGolf machine for all of my lessons in the winter. The feedback and tracking are absolutely perfect for instructors, and helps students really see what I am talking about when I tell them what is going wrong with their swing. I recommend these simulators to instructors and golfers alike, you will see a steady improvement by practicing on these simulators on a daily basis."

-Nicholas Harwood - PGA Professional

"I researched golf simulators for a year before deciding on the Vista 10 from TruGolf. It was a great decision. It is a high-quality product that was easy to assemble and customer service has been fantastic. My kids and I use it daily. I would highly recommend this company."

-Daniel Klassen

"I love my new Vista 12 Simulator. Thanks to everyone at TruGolf, especially Lanny & Eric for the fantastic customer service. My Vista 12 is a fabulously accurate product, highly recommended! I'm hoping to go low this year!"

-John Nugent

"If you are undecided on which company to buy the right simulator setup from, TruGolf's customer support is a notch above the rest which coupled with the systems E6 software raises them straight to the top of my list."

-Alex Catalano

We have a few different indoor virtual golf simulators in Calgary, AB to choose from. However, in only just a week Grand Slam Golf Academy is getting comments like:

"Best ever played."

"Every shot is exactly as expected."

"Putting and Chipping is FAR Superior than other simulators."

"Most realistic simulator I've ever seen."

"Incredible graphics."

... and much more along the same vein. Let's face it, TruGolf not only invented video game golf software, but they have perfected it, so why would anyone be surprised that they also have the best hardware?

-Larry Dafoe - Grand Slam Golf Academy

"Great simulators! I had their old Newport Simulator and just upgraded to the Vista 10. The playing experience is realistic and the graphics are awesome. Combine that with E6 and TruGolf is hard to beat. Best part about this company is their customer service. If you have any issues they are there for you."

-Alec Sarrazolla

"The TruGolf Simulator has been a great amenity that we added to the club. In fact, we have bought two. With such a short season in Park City, Utah, we were looking for ways to engage our membership while the golf course is under snow. The TruGolf Simulator has been a great addition and is booked all winter long. We run weekly leagues, give lessons, and the members love playing different golf courses from all over the world. One benefit we did not anticipate was the increased food and beverage sales that have come from having the simulator. It has been a great addition to the Jeremy Ranch Golf and Country Club."

-Chad Pettingill - Jeremy Ranch Golf & Country Club

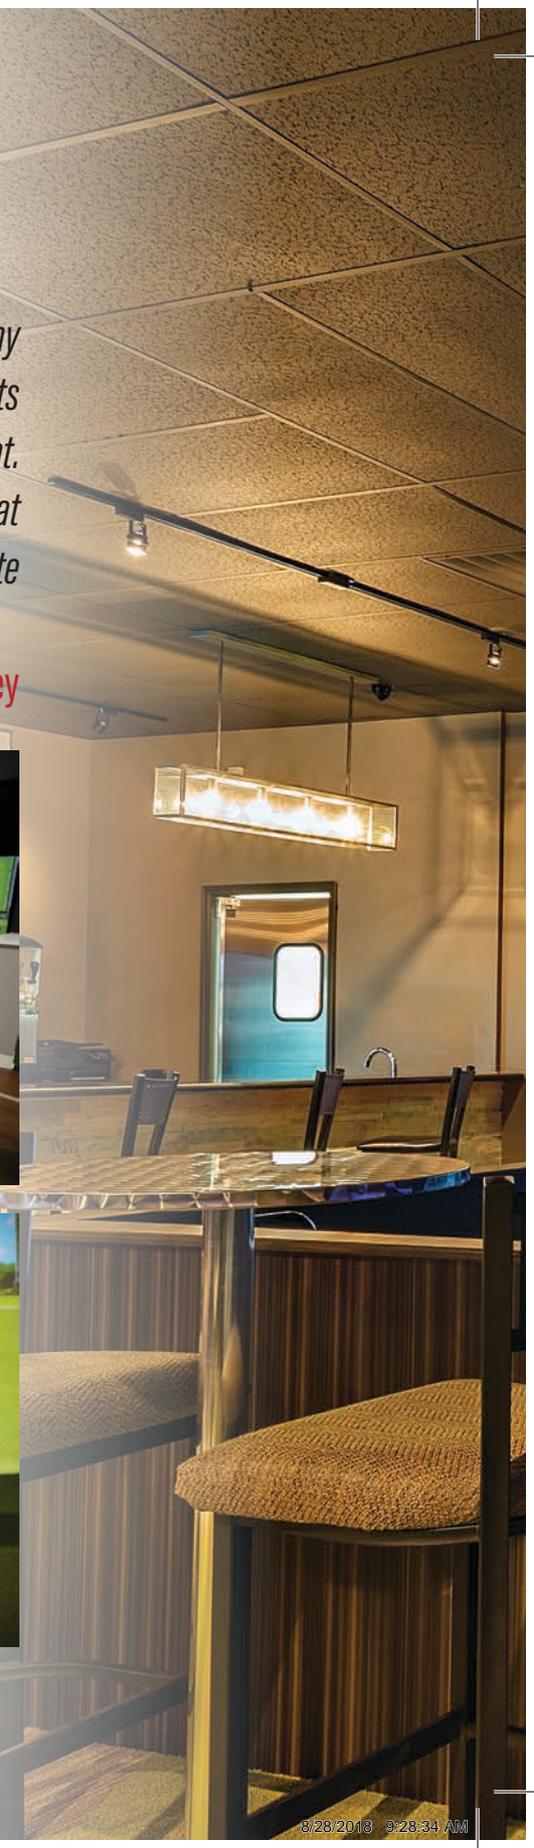

GOLF in
DORION

GOLF in

GOLF in
DORION

"I've had my TruGolf Simulator for at least 5 years. I've used it to practice both my short game as well as my long irons and driver. I've used it to play the many courses installed. And I've used it to have long drive contests with buddies. It is a fabulous tool to improve my short game, as well as a fantastic form of entertainment. Without a doubt, one of the very positive things about TruGolf has been the support system. I can't say that I've had much need for support, but when I've needed software updates (I'm not terribly computer literate myself) my text or calls are answered incredibly quickly by a cheery and helpful person."

-John Halsey

E6 CONNECT

Professional Golf Software For Your Home or Business

VISION

To date, virtual golf, video game golf, and real golf have never had one-complete connective solution. E6 CONNECT is the single solution to combine traditional gaming with interactive simulation. TruGolf is creating the network that will link virtual and real golf together to make the sport more relevant, exciting, and accessible for players all over the world.

E6 CONNECT will be the scalable eSports solution for golf. This multi-use platform will provide competitive golf gaming for: Simulators, Consoles, Mobile Users, and PC Gamers. The game will be device-agnostic and available on most operating systems

From golf gaming to real-world play, E6 is the software hub of golf. This solution is the ultimate tool to drive engagement, measure performance, and provide meaningful competition worldwide.

With E6 CONNECT, we will grow the game.

E6 COURSE CREATION

A Perfect Blend of Art and Science.

Since 1986, we have transported our customers from the comfort of their homes to the most striking golf destinations in the world. From our beginning, we have been committed to a single mission: to create the most lifelike golf simulation software possible. Our passion is faithfully creating and capturing the nuance and the artistry of the game.

Our process is proprietary; we do not use pre-built objects and we do not rush production. Our team of artists builds all objects inside of our game – faithfully recreating trees, rocks, and plants and placing them as they appear on the real course. Our landscape data is derived from LiDAR mapping; accurate within centimeters. This process is why the E6 experience is more immersive than other offerings. We approach the process with both art and science, ensuring that we capture and provide an authentic experience for you, the player.

Our new engine, E6 CONNECT, features high-definition visuals, 3D surround sound, and amazingly realistic water and ocean effects. These upgrades have afforded us the opportunity to tailor the experience on each course; creating a more lifelike golf experience for our users. With the all-new “Atmosphere” settings in E6 CONNECT, players can create an overcast day in Oregon, a clear afternoon in Florida, or a pastel colored sunset in South Carolina. These adjustments make your round of virtual golf truly transportive.

Whether playing the game on the computer, or with one's own clubs in a performance golf simulator – E6 will immerse the user in the history and aura of these courses. From Kiawah Island to Bandon Dunes, Royal Melbourne to Valderrama – when playing E6, users will understand what it means to play at these destinations. E6 allows users to customize course conditions, making it the most realistic simulation software available. What would Pebble Beach be without wind?

“Capturing the soul of the course...”

This game is about imagination and execution. The best course architects in the world combine both in their design. And you can discover their work like never before with E6 CONNECT. The new, high definition visuals help you experience the surrounding natural beauty – making it possible to understand the inspiration these architects felt when they designed the course.

AVIARA GOLF CLUB

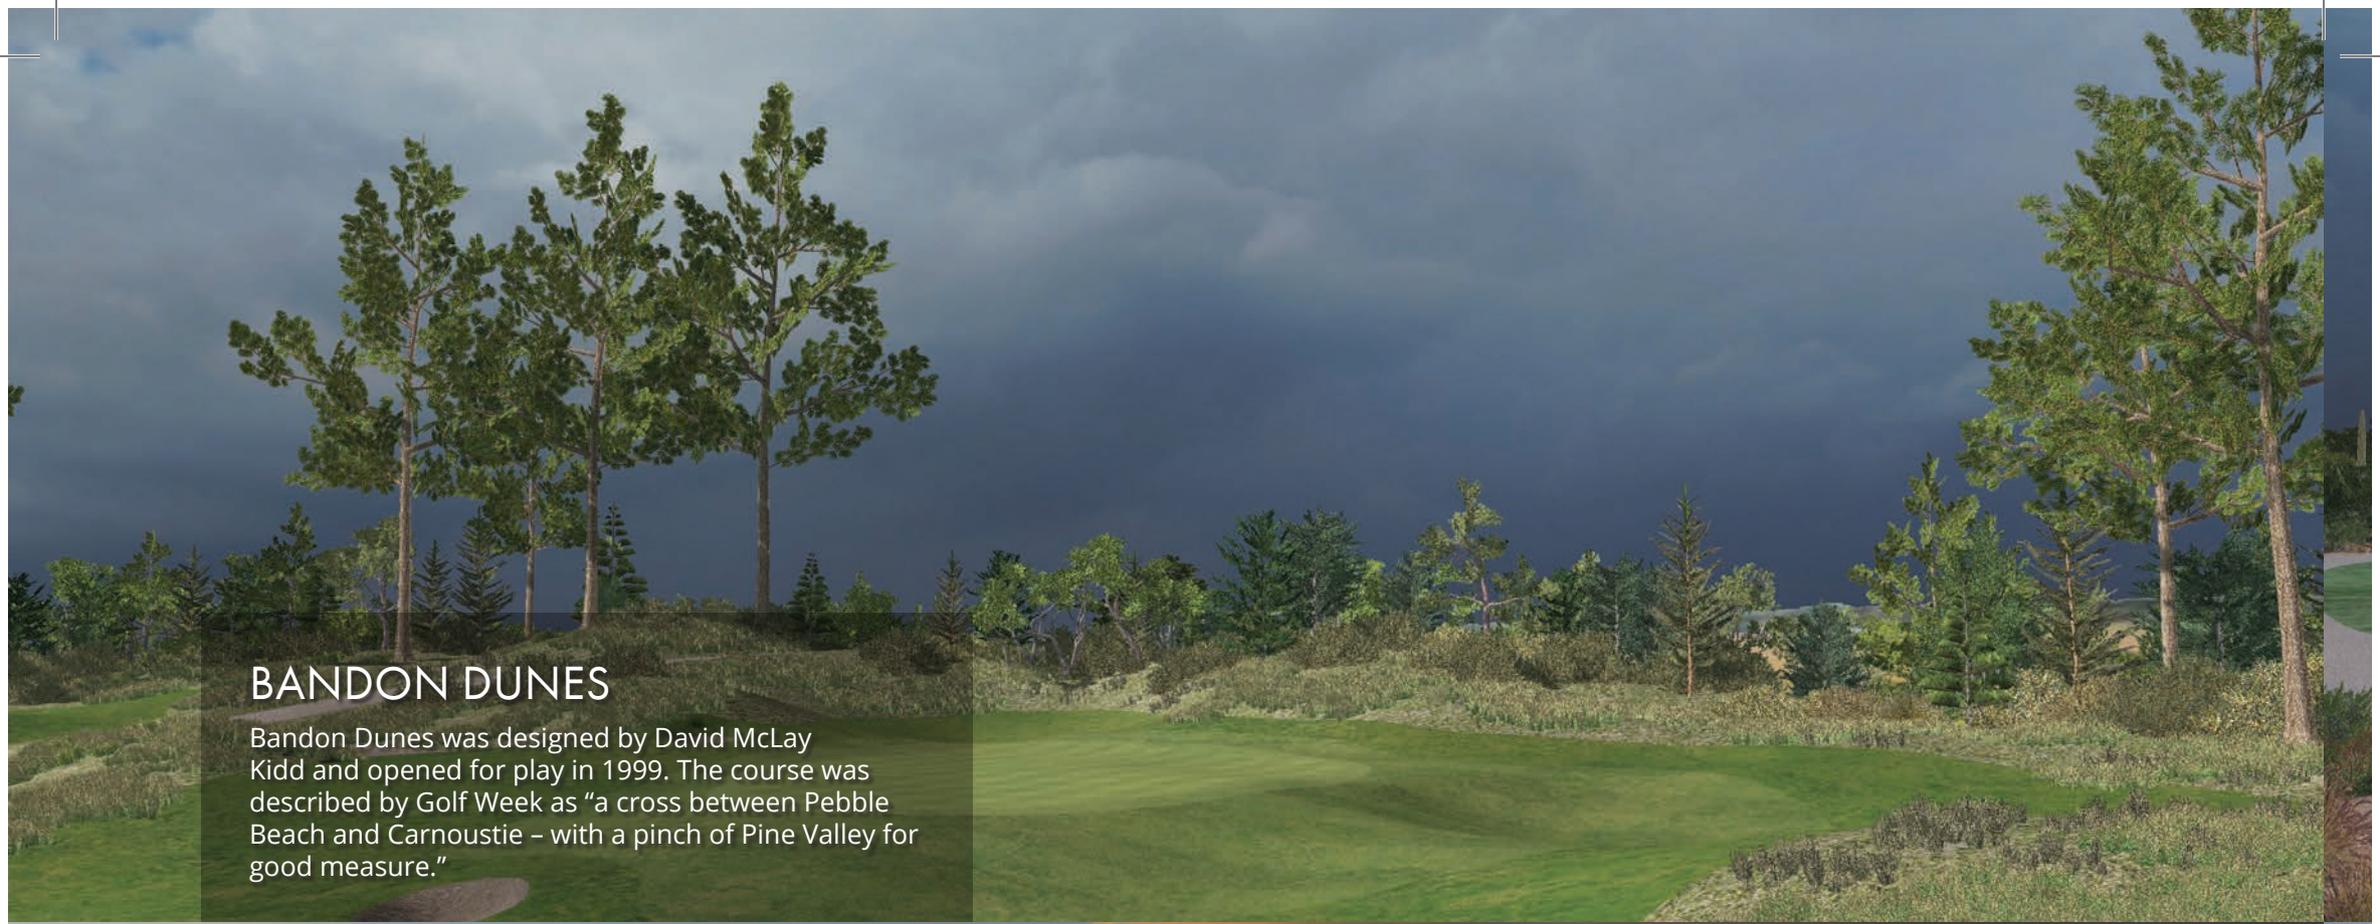

Aviara Golf Club in Carlsbad, California offers championship golf, world-class accommodations, and perfect coastal weather. This is the only coastal golf course that was designed by Arnold Palmer and is home to the LPGA's "Kia Classic." It has been rated as one of the "Best in State," for California and ranked as the #1 Course in San Diego.

SAND RIDGE GOLF CLUB

Tom Fazio's first Ohio golf course is a natural masterpiece. Situated in the western foothills of the Appalachian Mountains, the course features gently rolling countryside, dramatic elevation changes, unique wetlands, and a plentiful mix of mature hardwoods.

BANDON DUNES

Bandon Dunes was designed by David McLay Kidd and opened for play in 1999. The course was described by Golf Week as “a cross between Pebble Beach and Carnoustie – with a pinch of Pine Valley for good measure.”

FIRESTONE

Located in Akron, Ohio, Firestone Country Club was established as a generous perk from Harvey Firestone to his employees. This 7,283-yard par 70 course was nicknamed “Monster,” by Arnold Palmer – after the King scored a triple bogey on the 16th hole. The course was home to the WGC Bridgestone Invitational.

SCOTTSDALE

This fantasy course is inspired by the Sonoran Desert and the unmatched beauty of the American Southwest.

LATROBE

The small township is known for its idyllic views and being the hometown of golf legend Arnold Palmer. The creative golf course was improved and redesigned by The King, whose legend can be traced all the way back to the course's creation.

ROYAL MELBOURNE

Founded by Sir James McBain in 1895 and designed by Alister Mackenzie, Royal Melbourne is a 36-hole championship golf facility in Black Rock, Victoria. Known for its dramatic undulation, fertile soil, and natural appearance, the West Course highlights the natural beauty of Melbourne.

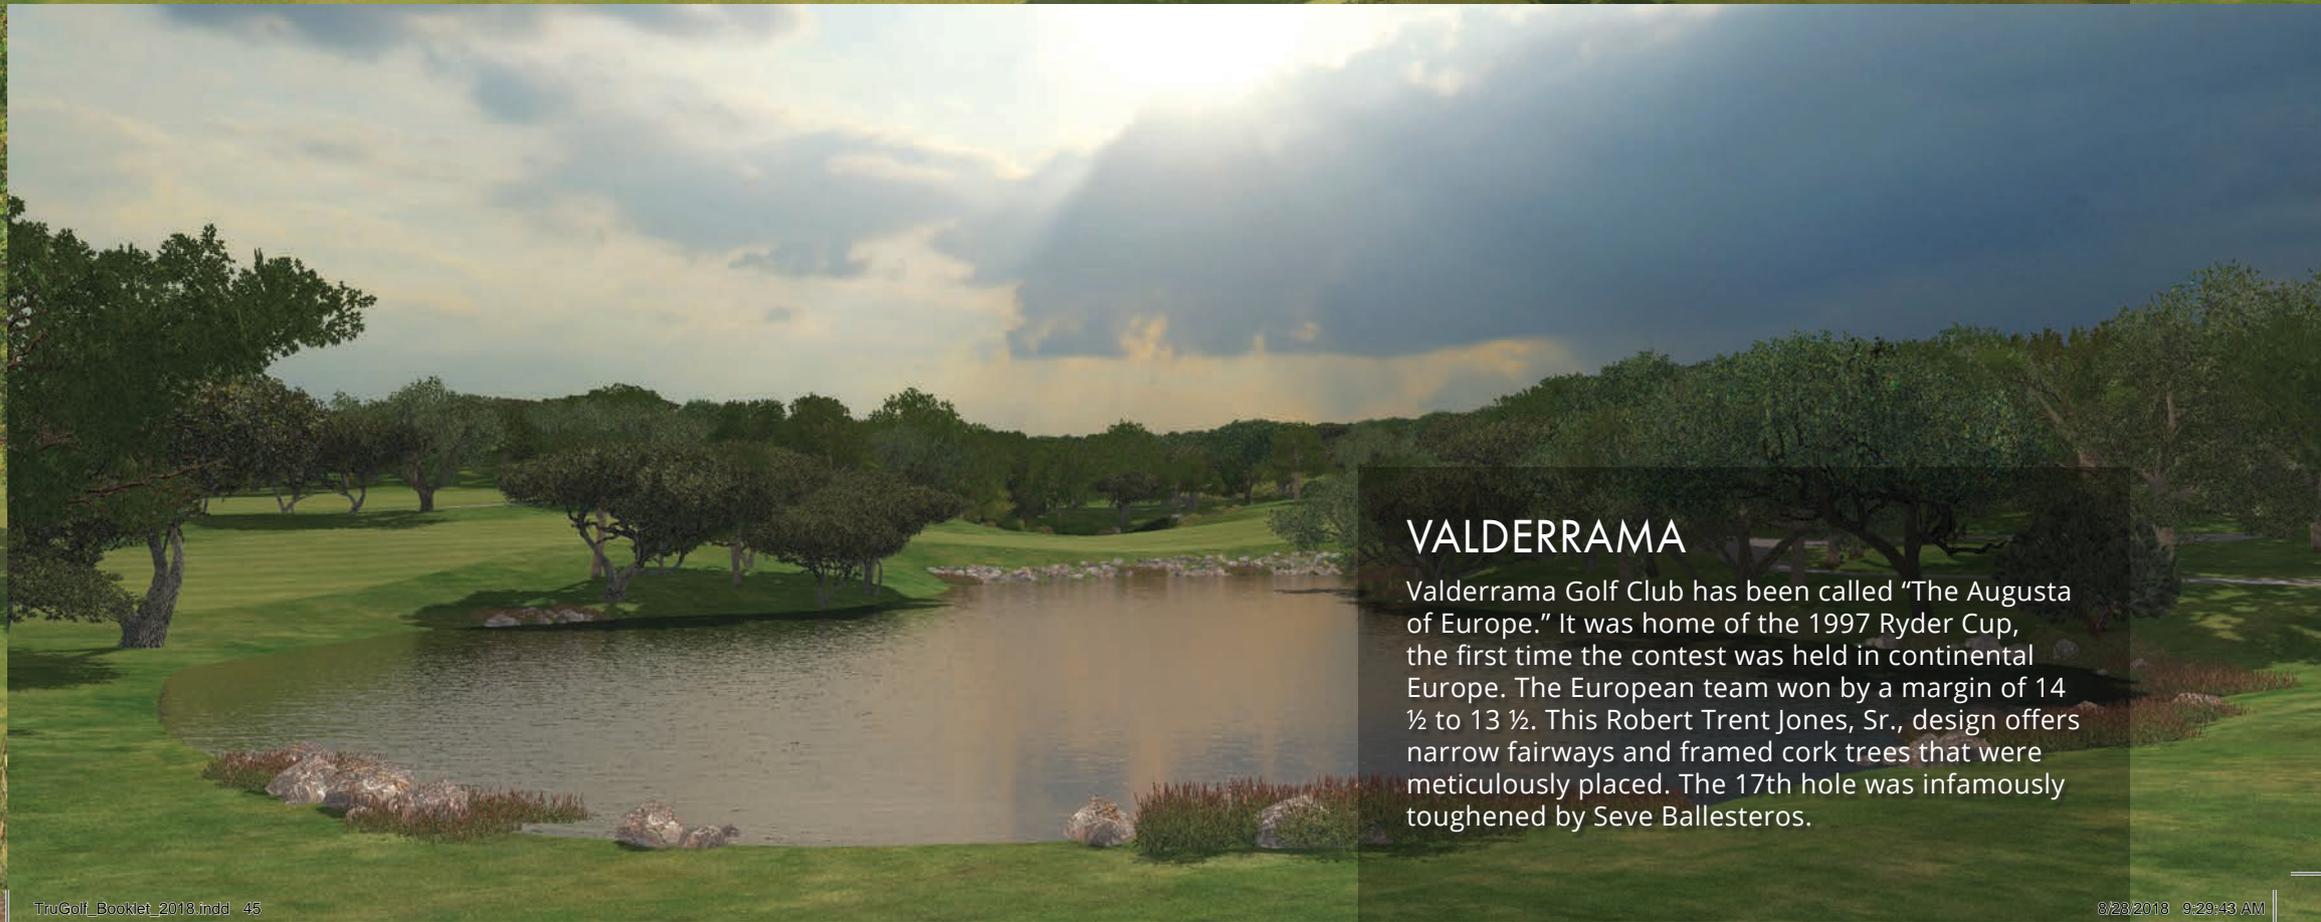

LOCH LOMOND

The course was designed by Tom Weiskopf and Jay Morrish, who were later praised for their heavy use of natural hazards like streams and marshlands. The course was home to the Scottish Open for a number of years.

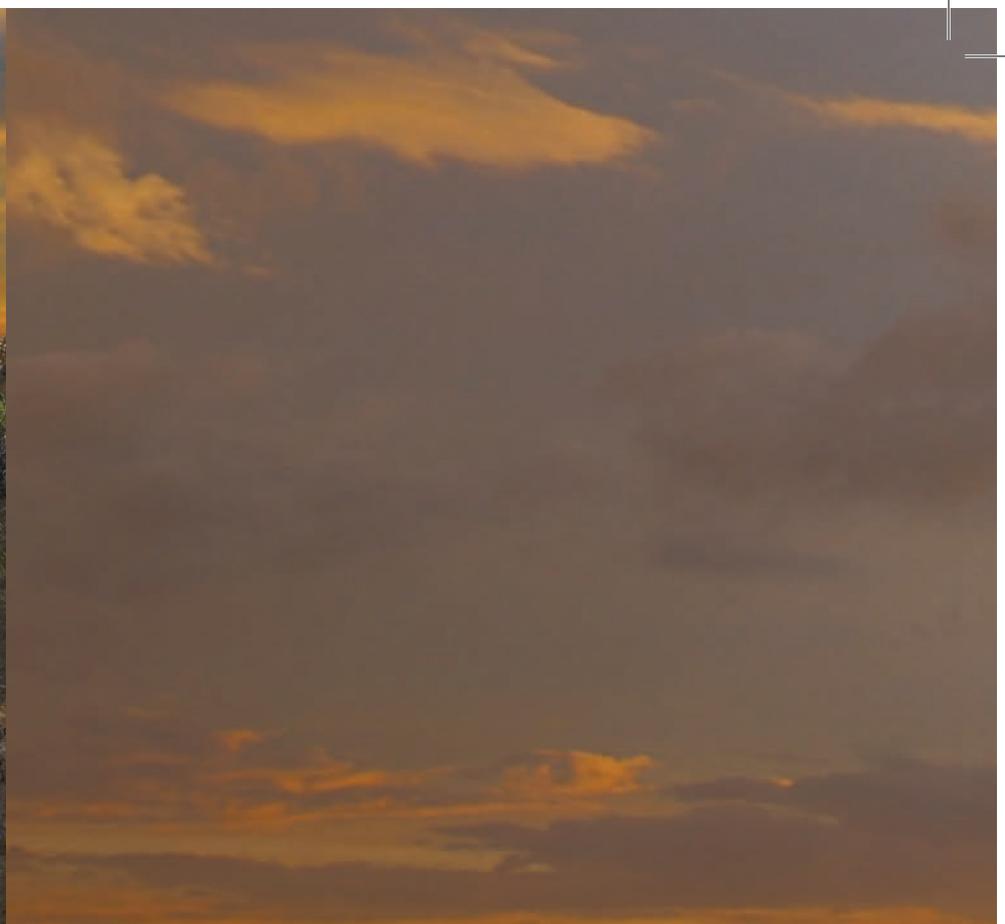

BOUNTIFUL RIDGE

In a small suburb of Salt Lake City, UT, is one of the best municipal courses in America. Bountiful Golf Club is known for its excellent condition and superb value.

VALDERRAMA

Valderrama Golf Club has been called "The Augusta of Europe." It was home of the 1997 Ryder Cup, the first time the contest was held in continental Europe. The European team won by a margin of 14 ½ to 13 ½. This Robert Trent Jones, Sr., design offers narrow fairways and framed cork trees that were meticulously placed. The 17th hole was infamously toughened by Seve Ballesteros.

STONE CANYON

Stone Canyon, situated in the Oro Valley outside of Tucson, is as stunning as it is creative. Jay Morrish, the course designer said, "it's the most remarkable desert site I've ever seen. None of the others are in the same league with Stone Canyon." Even this ringing endorsement does not do Stone Canyon Golf Course justice. From the rock formations to the picturesque view of the Tortolia Mountains, Stone Canyon is a masterpiece of golf and landscape design.

SANCTUARY

Just outside of Denver, Colorado is one of the most exclusive golf courses on the planet. Sanctuary was designed by Jim Engh and was declared as "The USA's Best New Private Courses," by Golf Digest when it was opened.

CHATEAU WHISTLER

A fun and challenging course for players of all levels, this Robert Trent Jones, Jr. masterpiece opened in 1993. It is carved out of the slopes of the Coast Mountain range in British Columbia and it traverses through creeks, ponds, and granite rock.

BAY HILL CLUB

Bay Hill Club and Lodge is an 18-hole golf course that was opened in 1961. Bay Hill was home to golfing legend Arnold Palmer and the eponymous PGA Event, the Arnold Palmer Invitational. Palmer took ownership of Bay Hill in 1975, and ever since it has been considered one of the top golf resort destinations in America.

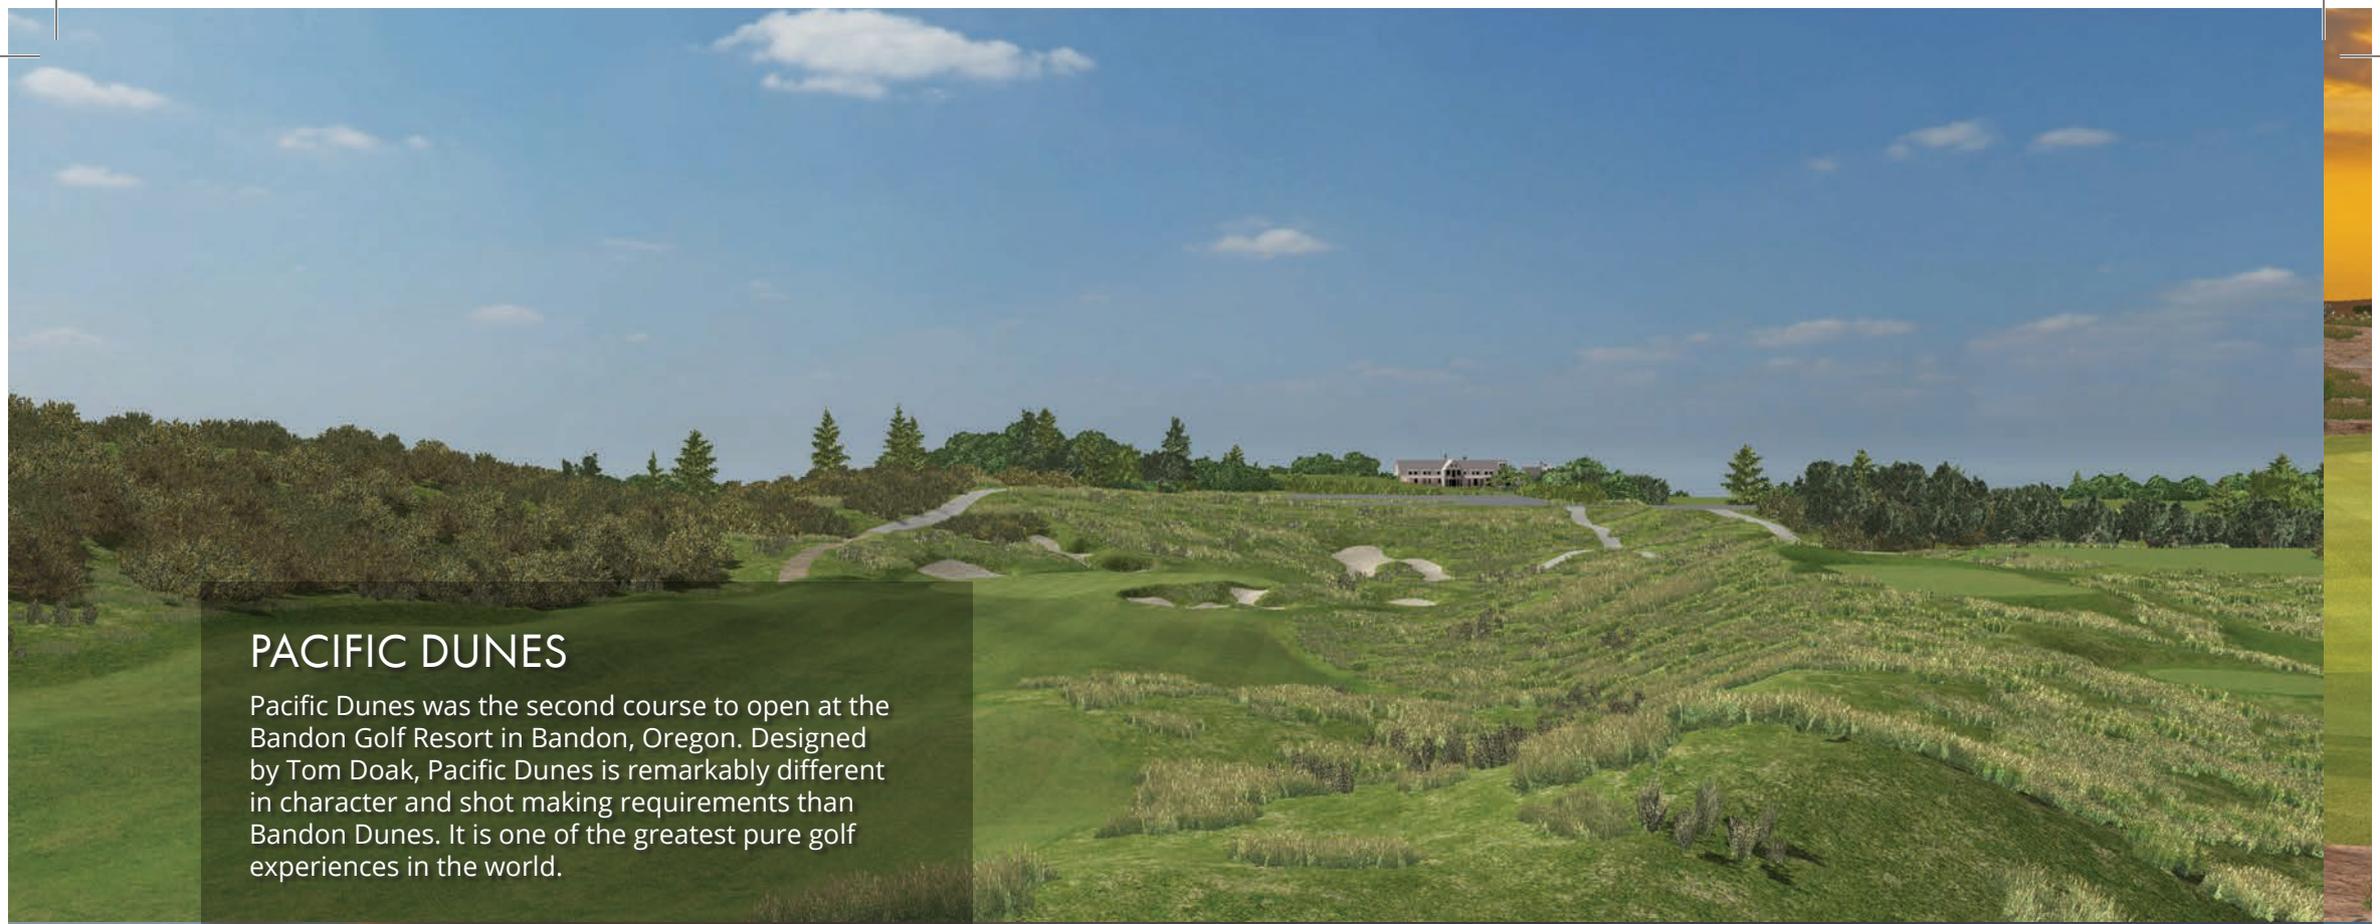

PINEHURST NO. 8

No. 8 opened in 1996 to commemorate Pinehurst's Centennial. Fazio incorporated signature Ross features into the design of No. 8, including dips and swales around the greens, sloping greens, and false fronts.

BANFF SPRINGS

Banff Springs Resort is located in the majestic mountain town of Banff in Alberta, Canada. This charming place is renowned for its panoramic beauty, incredible skiing, a unique film festival, and its world-class golf course. The original 18-hole course was built in 1928 by Stanley Thompson, one of Canada's most famous course architects.

PACIFIC DUNES

Pacific Dunes was the second course to open at the Bandon Golf Resort in Bandon, Oregon. Designed by Tom Doak, Pacific Dunes is remarkably different in character and shot making requirements than Bandon Dunes. It is one of the greatest pure golf experiences in the world.

HARBOUR TOWN

Harbour Town is located in Hilton Head, South Carolina. This course hosts the RBC Heritage, the first tournament following The Masters. It is known for its narrow fairways, pines, palmettos and oaks.

TAGHAZOUT

This fantasy course was inspired by the rugged terrain of the Kingdom of Morocco.

PINE CANYON

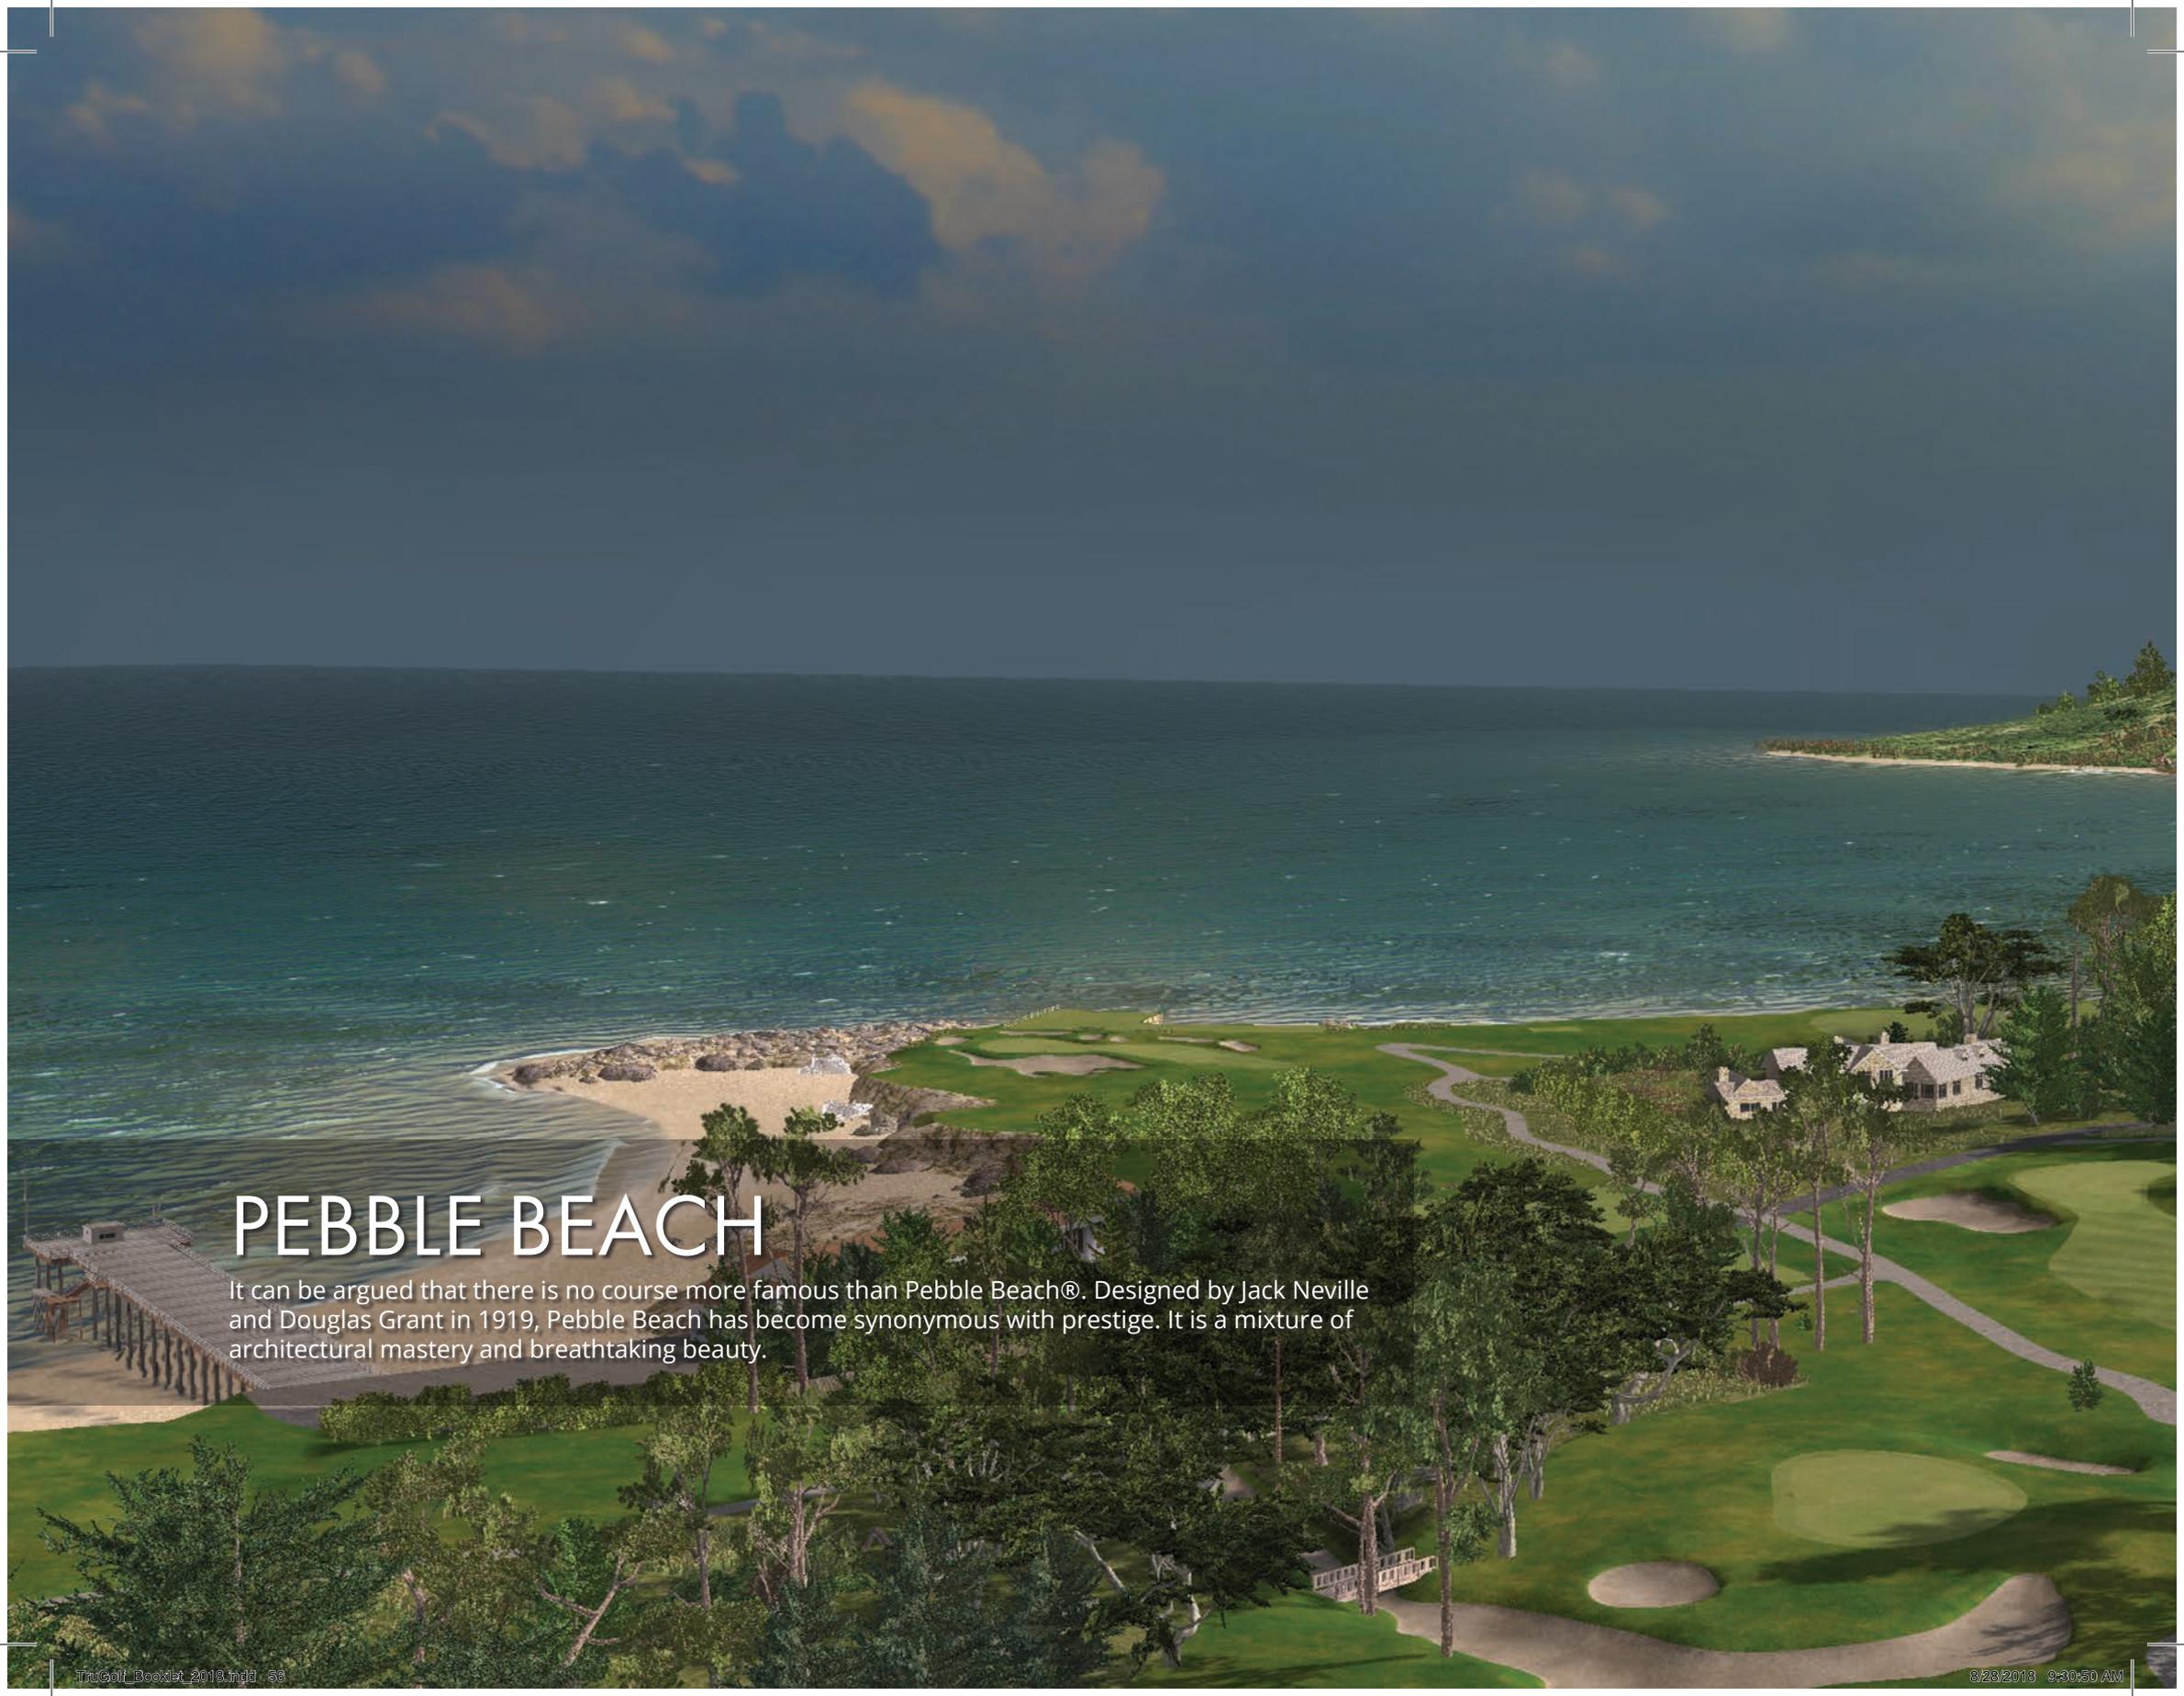

Pine Canyon packs the “wow,” factor for any golfer who thinks they have seen it all. Designed by Jay Morrish, the course opened in 2004. Pine Canyon is lined with beautiful Ponderosa Pines and dramatic features that are in play throughout the course. It is one of the most exclusive private clubs and golf communities in Arizona.

WADE HAMPTON

Located in Cashiers, North Carolina, beneath the Great Smokey and Blue Ridge Mountains, Wade Hampton is considered by most serious golfers to be an outstanding example of golf course design. The course balances new ideas and old traditions to create an always unique and extremely challenging round of golf.

An aerial photograph of the Pebble Beach golf course. The image shows a lush green golf course with several sand traps and a winding path. In the foreground, there are dense green trees. To the left, a wooden pier extends into the ocean. The coastline is rugged with rocky outcrops. In the background, the ocean meets a dark, cloudy sky. A few buildings are visible on the right side of the course.

PEBBLE BEACH

It can be argued that there is no course more famous than Pebble Beach®. Designed by Jack Neville and Douglas Grant in 1919, Pebble Beach has become synonymous with prestige. It is a mixture of architectural mastery and breathtaking beauty.

ARCADE GAMES

A NEW WAY TO LEARN THE GAME

HENYET

Introducing Henyet, the all-new mini game available to E6 CONNECT subscribers. Henyet is a target-oriented game, where players are awarded points for the targets they hit. Henyet accommodates up to 8 players and offers flexible game play settings. Adjust the number of attempts, difficulty level and time duration of the game.

SOLARO

Solaro accommodates up to 8 players, all competing to black-out the playing field with their team colors. Tee-shots ricochet all over the map, changing the tiles to your team color. The player to capture the majority of the field wins. Nearly every shot will get you points, making this game perfect for younger golfers.

DEMOLITION DRIVING RANGE

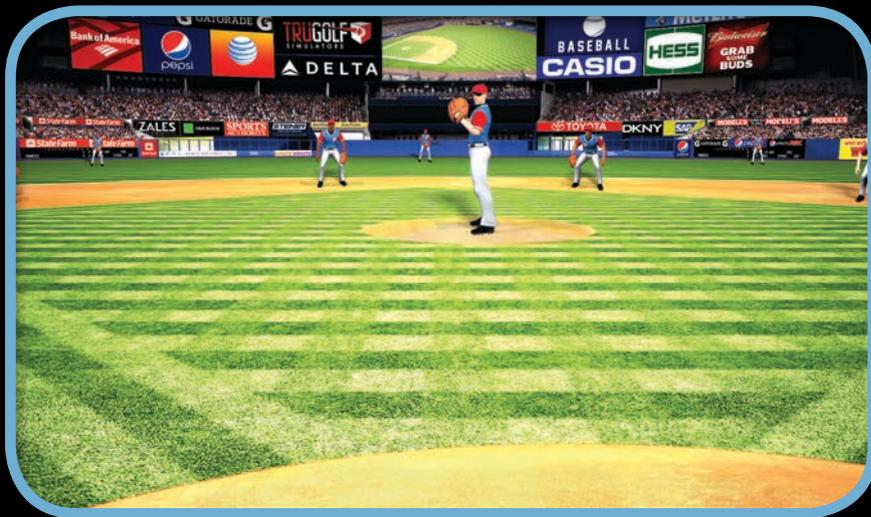

Take aim at a driving range full of exciting targets that explode when you hit them! Earn enough points with your first five shots to unlock the Ring of Fire. Send a final ball through the RING OF FIRE and earn 1000 bonus points! Demolition Driving Range is the most fun you'll ever have playing golf. Play alone, head-to-head or with a big group of friends.

SPORTS GAMES

TRUGOLF MULTISPORT

Experience your favorite sport in ultra-high definition with TruGolf's newest sports games. Our team has developed new, immersive, MultiSport Simulation for the whole family! Whether you are batting to load the bases or taking a slap shot in overtime, these new games offer dynamic play for all ages. Compete head-to-head and experience your favorite sport like never before.

This brand-new software package allows users to play Baseball, Hockey, Soccer, and more with their own equipment! The best part is that this MultiSport simulation is available for all TruGolf Simulators, including the Vista Series. Add this package on to your purchase today and get in the game!

COMMERCIAL TOOLS

MARKETING ANALYTICS & COMMERCIAL TOOLS

We have designed a complementary web-based management system for our commercial customers. With Management, Marketing, and Golf Tools, users will be able to run and grow their business easier than ever before with a "Clubhouse," from E6. With E6 CONNECT, you can control and manage your simulators and players from anywhere with internet access.

CLUBHOUSE

Any player who enters an Event or Tournament at a facility using E6 CONNECT will automatically be added to the Clubhouse registered to that Simulator. Clubhouse owners will be able to post notifications that appear in the user's E6Golf Online dashboard and send messages to the user's Player Profile, alerting players of new deals, special pricing, events, and more.

TruGolf will be developing CRM and Analytic tools throughout the year to help business owners maximize ROI through their simulators. Soon, E6 CONNECT will offer a whole suite of business software solutions. Complete with an Online Reservation System, E6 CONNECT is the complete solution for your business.

LEAGUES AND TOURNAMENTS

In addition to CRM tools, E6 CONNECT offers flexible League and Tournament software solutions. Facilities can create year-long Leagues, with flexible point payouts for: Stroke, Best Ball, Scramble, Closest to the Pin, Long Drive, and more Modes of Play. These Leagues will have Leaderboards, updated in real time, designed for customers to check-in from home. Your customers will be able to track their performance and progress through their E6Golf Online Player Profile.

RANGE REVOLUTION

E6 RANGE

E6 RANGE is ready to help you take advantage of the smart driving range; one of the biggest growth industries in golf. Give every player at your driving range professional swing analysis via mobile phone. Players can track their shots, ball flight, and play virtual range games with a centralized tracking system, simultaneously tracking multiple golfers at once.

RANGE GAMES AND VIRTUAL COURSES

Our team of artists and programmers have been building unique golf content for nearly 30 years. With E6 RANGE, your driving range customers will have access to play any of the 100 world-class courses offered in the E6 CONNECT library or compete in Peer to Peer contests with golfers around the world. Contests include virtual Stroke Play, Long Drive and Closest to the Pin events or any E6 CONNECT mini games. Additional Modes of Play and Mini Games will be available throughout the year.

E6GOLF ONLINE

Your customers will be able to save and store every swing for later review online. Users can create a Player Profile and opt-in to store all of their swing data and shot history. Player Profiles give users access to in-depth reports about their performance history.

CUSTOM CONTENT

Are you looking for Custom Content to set your smart driving range apart? We can help. Work with our team of developers to create new content to drive business to your range. This content is all available via PC or iOS device to customers who sign in at your range! Results are easily shareable via Social Media.
